Ascent® Tardies iPhone Overview

Pressing the Scan button, at the bottom left, brings up the iPhone camera. As it is pointed to the Student ID card, it automatically focuses and reads the student barcode.

Sample Student ID card

After the barcode has automatically been read, the image will display at the top of your iPhone screen.

Tapping on Submit will place the student on the Tardy list, shown on the next page.

The Manage button, at the bottom, provides integration with your central Student data base, and synchronizes it with the Students in your school, which are accessed from the Students button at the bottom.

Tapping on Tardies, at the bottom, will display the list of tardy students, along with the date and time the Tardy was recorded.

Tapping on the print arrow in the upper right corner of the screen, will print the Tardy List to an AirPrint wireless printer.
