AcuPrint Technology® Forms Partnership with Timpanogos Technologies™ *Bringing CIMS® Software Users a Suite of Leading Secure Payment and Check Fraud Prevention Solutions*

CARLSBAD, California and SALT LAKE CITY, Utah – May 26, 2004 – AcuPrint Technology, a leader in secure printing and financial software, announced today that it has signed an agreement with Timpanogos Technologies, a software and support service provider for school districts, to market AcuPrint's suite of award-winning check fraud prevention solutions to their school district client base.

Timpanogos Technologies (Timp Tech™) provides a complete range of software and support services for school districts across the country that use the Comprehensive Information Management for Schools (CIMS®) software application. Timpanogos Technologies will offer software users of CIMS® the complete suite of AcuPrint Technology's secure payment products, including the SecureCheck nX² MICR laser check and form printing system, the SecurePay positive pay solution, and the ezSigner secure document signing solution. These tools allow CIMS® users to implement a complete end-to-end check fraud protection plan.

“By partnering with AcuPrint, we expand our offering to school districts with high-quality solutions to eliminate their exposure to check fraud, as well as lower their operating costs in these times of tighter education budgets. These secure payment solutions are designed to integrate with the school district's existing financial information management system,” states Joni Nevin Wing, Vice President of Timpanogos Technologies.

“AcuPrint is very pleased to partner with Timpanogos Technologies to bring CIMS® users our complete line of fraud prevention solutions. AcuPrint solutions are compatible with virtually all platforms and environments, and are backed by our first-rate technical support team to guarantee Timpanogos Technologies' clients an easy installation,” states Wally Papciak, President of AcuPrint Technology.

About Timpanogos Technologies™

Timpanogos Technologies is a leading provider of supplemental software and support to school districts using CIMS® products. The company is headquartered in Salt Lake City, Utah, with offices in, Arizona, Oregon, Michigan, Oklahoma and New Mexico. They also promote relationships with regional support vendors to provide local first line product assistance to schools. For more information, please visit www.timpotech.com.

About AcuPrint Technology

Headquartered in Carlsbad, CA, AcuPrint Technology is a pioneer in MICR laser check writing software solutions.
